Re: Cedar Canyon Adventure Program, K850000228

This letter is in response to the Office of Juvenile System Oversight request for additional information to the Oklahoma Child Care Services (OCCS) written response on February 19, 2010.

Due to the contract with the Oklahoma State Department of Health (OSDH) to conduct annual food service inspections to certain residential child care programs, the OCCS must request the inspection on behalf of the licensed residential program. This process includes a quarterly report to the OSDH listing past due inspections and inspections due for the next three months. This listing is pulled from the OCCS database and communicated from OCCS State Office staff to the OSDH. (The licensing staff are not responsible for this particular duty.) We are aware that there are past due inspections and must rely on the prioritization of the OSDH and county health inspectors to conduct these as their work loads allow.

Please let me know if you need additional information regarding this issue.

Sincerely,

Susan Case, Programs Manager
Residential and Agency Licensing
